

Cleaning Stainless Steel Surfaces from Scotch Marks

Overview¹

Review our directions for how to clean stainless steel surfaces from scotch marks.

Caution: Wear protective ANSI approved safety glass, working gloves and breathing mask at all times.

Required

- 1) [Scotch-Brite™ Non Scratch Scrub Sponge](#)
 - 2) Dish soap
 - 3) Paper towel
-

Directions

- 1) Wet the sponge with water and then add dishwashing liquid
- 2) Hand scrub the marked surface with the same direction of the grain using the

Round Tubing

- 1) Wet the sand paper with water or stainless steel cleaner
 - 2) Sand the scratched surface in the same direction of the grain.
 - 3) Clean the surface using a paper towel. Repeat until the desired finish is achieved.

NOTE: A small amount of surface corrosion is not uncommon after a some exposure to weather or salty conditions. We recommend using our [passivation solution](#) or some sort of stainless polish to keep any surface corrosion from happening; more information available [on our Engineering Specs Page](#).
